# HMIS ISSUES

- Data misreporting as data definition are not clear to all service providers
  - Confusion in reporting the data under particular data element by the service providers - Misunderstanding of data element/ Lack of knowledge on data element definitions
  - Gap in recorded and reported data - mismatch between data available in registers and data submitted in HMIS format
  - Data Authentication (duly signed by authorized person) of monthly report
  - Percentage of Data filled in HMIS format is around 80% out of which Zero reported is around 40%
  - No data analysis at Block & District Level
  - Team of DPMU should be taken initiative to sensitize the ANMs, Staff Nurse, MHW, FHWs pharmacist, Supervisors and other concern person seriously for issues of HMIS. MOIC/ CS should be involved to sensitize the reporting system in HMIS.
-
